

Design and Delivery of Multi Utility Services

Water | Electricity | Gas | Telecoms

 Network Plus
Multi Utility

We offer a comprehensive solution for developers and construction companies.

Our service saves you time, and hassle by providing a single point of contact, coordinating your Multi Utility installation from start to finish. We save you money by implementing shared trenching across your utility needs.

With an experienced team of in-house Multi Utility experts and a national presence, we provide the complete package for your utility needs. Highly capable and fully accredited in the design and construction of water, electricity, gas, and telecoms networks, we offer a professional solution, peace of mind and bring value to your project.

Our qualified team of Engineers work on projects of all sizes, delivering a complete Multi Utility service to residential, industrial, commercial and mixed-use developers.

Our in-depth knowledge and significant experience enables us to adapt and meet the needs of your projects, ensuring that your project is planned effectively, safely delivered to the highest technical standards.

Network Plus Multi Utility is part of the Network Plus group, a leading service provider for utility and infrastructure, operating across the UK.

With more than 20 years experience, Network Plus has worked with major utility organisations and infrastructure providers for water, power, gas and telecoms. Combined, we have more than 60 office and depot bases around the UK, with a workforce of over 5000.

Design to Construction - A comprehensive solution delivering cost savings through a single multi-utility package.

Planning

Our team of experts will support you through the early stages of your project, assessing initial plans, and carrying out early assessments to guide and support your decision-making process.

We manage all administrative requirements associated with your multi utility needs, with the knowledge, systems and inhouse processes to liaise with local councils, asset owners and regulators for each utility service.

Through our sister company, Go Traffic Management, we can also set up the required traffic management solution, tailored to your project.

Design

Our specialist design team will create designs to your specific project requirements. They have a wealth of knowledge and are familiar with the technical standards required by the utility infrastructure organisations.

Delivery

Providing gas, water and electrical installations through a single trench will save you time and money.

With a focus on delivering a safe and compliant Multi Utility solution, our teams undertake risk assessments, method statements and correct working methods. We adhere to the strictest industry standards and comply with government legislation.

Project Management

Our experienced project managers will advise you on technical matters, guiding you through the process from start to finish, acting as a single point of contact for you, external suppliers, and your teams.

Due to our substantial track record in working with the UK's largest utility and infrastructure organisations, our teams have a comprehensive understanding of their preferred ways of working, as well as technical standards and requirements.

Our Services

Network Plus Multi Utility offers a complete end-to-end service for new utilities on developments and schemes of all sizes. We offer on-site cost savings through installing all utilities in a single, shared trench.

Our extensive experience provides clients with a single point of contact and integrated utilities solution that is skilfully administered. Our services include new infrastructure construction, mains and service connections, disconnections and diversion across all sectors.

Water

- Service relocations
- Pressure and chlorination testing

Electricity

- Temporary builder's electricity supply
- Substation installation and commissioning
- Streetlighting
- Residential and I&C new connections

Gas

- Service relocations
- Large diameter gas service
- Connections and commissioning
- Gas supply contracts
- Governor installation and commissioning

Telecoms

- Ducting
- Installation of manholes and boxes

Our Vision

We aim to be the industry's preferred Multi Utility provider through safely constructing, managing and installing essential Multi Utility Services at the lowest sustainable cost.

We deliver:

- Customer service excellence
- Quality assurance
- A cost-effective service
- Streamlined end-to-end service

Our Team

We have a dedicated team of high experienced professionals who will support you through all aspects of design.

Service delivery

- Built upon a depth of experience through our core business at Network Plus, we have the scale and resources to deliver outstanding service to existing and new clients.
- Recognising the need for cost certainty and on-time delivery, we offer an all-inclusive service package from initial planning and design through to delivery – which helps to ensure that there are no hidden or unplanned costs.
- We continually look at ways to adapt and improve the services we offer, with a focus on safety. We have an in-house health and safety team, supported by the latest technologies and systems. We conduct site specific inductions and relevant risk assessments.

Accreditations

- We are an approved member of the National Electricity Registration Scheme (LRQA), Gas Industry Registration Scheme (GIRS), and Water Industry Registration Scheme (WIRS).
- Network Plus Multi Utility has been technically assessed by Lloyds Register. We are qualified for design, project management and construction.
- We have the technical knowledge to ensure Multi Utility Services meet the stringent standards set by asset owners before they are commissioned.
